

THE 2010 ASSESSMENT INSTITUTE IN INDIANAPOLIS

Presented by

The Office of
Planning and Institutional Improvement

at

Indiana University-Purdue University
Indianapolis

October 24 – October 26, 2010

The Westin Indianapolis
50 South Capitol Avenue
Indianapolis, Indiana

Trudy Banta, Karen Black, and colleagues at IUPUI whose work is featured in the 2010 Assessment Institute in Indianapolis would like to express our sincere appreciation to the sponsors, exhibitors, and advertisers who have given their support in the various ways that are described below and in the pages that follow.

Sponsors

Platinum Sponsor: Providing Institute Lanyards for Participants

TaskStream

By shifting the focus from product to process, TaskStream empowers institutions to go beyond compliance to establish a culture of continuous improvement. We provide the highest quality web-based software and supporting services to efficiently plan and manage assessment processes and facilitate the demonstration of learning achievement. Using TaskStream's powerful tools for assessment and accreditation planning, outcomes alignment, e-portfolios, rubric-based data collection and reporting, field placement management, surveys, and more, educators around the world are ensuring that students are learning the skills and knowledge they need to be successful in today's global economy.

**NSSE and CSEQ
IU Center for Postsecondary Research**

The IU Center for Postsecondary Research hosts the National Survey of Student Engagement (NSSE) and its affiliate surveys, the Faculty Survey of Student Engagement (FSSE), the Beginning College Survey of Student Engagement (BCSSE), and the Law School Survey of Student Engagement (LSSSE), as well as the College Student Experiences Questionnaire Assessment Program (CSEQ).

The Center provides surveys and resources to help institutions assess the extent to which students and institutions engage in empirically proven educational activities and to inform efforts to strengthen the learning environment. Survey results offer a snapshot of how students spend their time and of the extent to which they perceive that their institution supports their academic and personal development. Center efforts also contribute to initiatives related to student access, assessment, and persistence and the policies and practices that promote student success and institutional effectiveness.

Gravic

Thousands of institutions rely on the Remark Products to quickly and easily capture data from paper and web forms (tests, assessments, surveys, evaluations). Capture data from plain-paper OMR forms you create in any Word processor or form design program with Remark Office OMR and an image scanner. Remark Web Survey allows you to create, host, and administer your own online forms. Both products come with Remark Quick Stats, a built-in analysis component, which provides powerful reports to measure students' performance on specified learning objectives. Reports produced include student grade reports, demographic comparison reports, test statistics, item analysis, and many more.

Assessment that Yields Action Action that Yields Results

Based on IPEDS data, institutions that implemented a Foundations of Excellence® action plan to a self-reported “high degree” had an average 5.62 point (8.62%) increase in retention over four years.*

**Foundations of Excellence provides two assessment processes to improve institutional effectiveness for two critical populations:
First-Year Students and Transfer Students**

Foundations of Excellence is designed to engage faculty, staff, and students in a proactive, creative, evidence-based process to improve student learning and retention, reduce redundancies and identify gaps in service, and ultimately design a coherent and effective experience for new students. To date, 201 institutions have participated in this self-study and action-planning process.

Sunday, October 24, 2010

Pre-Institute Workshops – Special Registration Required

Track: 01A (FD)

Time: 9:00 a.m. - 3:30 p.m.

Room: Capitol 2

Pre-Institute Workshop

Sunday, October 24, 2010

Beginner and Advanced

Assessment Clear and Simple: Practical Steps for Institutions, Departments, and General Education

Emphasizing simplicity, feasibility, and effectiveness, this workshop offers a step-by-step plan for institutions, departments, and general education to build on what they are already doing, discard what is not working, get faculty on board, enhance student learning, meet the institution's own needs, and work with external accreditors. Special attention to current national developments such as the Voluntary System of Accountability, new ePortfolio developments, projects of the AAC&U and others, assessment software, and appropriate uses of standardized tests or survey instruments.

Barbara E. Walvoord, University of Notre Dame

Track: 01B (EP)

Time: 9:00 a.m. - 3:30 p.m.

Room: Caucus

Pre-Institute Workshop

Sunday, October 24, 2010

Beginner and Advanced

Implementing Student Electronic Portfolios for Assessment

Student electronic portfolios have been implemented for varied purposes throughout much of the world over the past fifteen years, generating considerable enthusiasm among their advocates. But the prospect of adopting and implementing ePortfolios remains daunting, in part because they can address so many different interests and purposes. In this full-day workshop, faculty and staff from IUPUI will share some hard-won lessons, focusing especially on ePortfolio uses to meet assessment needs for campuses, departments, and courses. Specific topics to be discussed include: an overview of student electronic portfolios and available software; implementation strategies at the institutional, departmental, and

Primary Tracks: (AC) – Accreditation; (AM) – Assessment Methods; (CP) – Capstone Experiences; (CC) – Community College; (CE) – Civic Engagement; (EP) – ePortfolios; (FD) – Faculty Development; (FY) – First-Year Experiences; (GE) – General Education; (MJ) – Majors; and (SD) – Student Development

individual course levels; and faculty and student development and support. Several IUPUI faculty members will offer real-life case studies of ePortfolio uses for a variety of assessment purposes. Small group discussion will provide opportunities for participants to consider uses, opportunities, and potential pitfalls related to ePortfolio adoption on their own campuses.

Susan Kahn, Debra Runshe, Susan Scott, and Lynn Ward, IUPUI

Track: 01C (FY)

Time: 9:00 - 11:30 a.m.

Room: Capitol 1

Beginner and Advanced

Planning, Implementing, and Using Assessment Results: A Case Study Approach

Assessment is an essential component of program development and refinement in University College, the unit at IUPUI that serves over 6,000 entering students.

Comprehensive assessment activities are necessary to plan, implement, and continuously improve first-year programs. All major programs, including orientation, advising, and peer mentoring, are regularly scheduled for reviews, a two-year process with self-study and outside review components. We plan to present some major assessment strategies such as proving and improving effectiveness, using assessment results for planning and resource decisions, involving faculty, measuring student learning outcomes, using quantitative and qualitative approaches, and linking data to action. We will also discuss some major challenges we have faced in implementing assessment plans. This workshop has been designed to appeal to those who are just beginning assessment activities on their campuses and for those who are interested in improving existing assessment programs. We will be using a case study approach to discuss critical issues and methods of assessment.

Michele J. Hansen and Daniel Trajillo, IUPUI

Track: 01D (AM)

Time: 9:00 - 11:30 a.m.

Room: Capitol 3

Pre-Institute Workshop

Sunday, October 24, 2010

Beginner and Advanced

Outcomes Assessment Nuts and Bolts

Outcomes assessment should help both program planning and accountability reporting. This workshop focuses on the steps needed to accomplish these goals, including stating outcomes, selecting assessment methods, describing the assessment process and results, and using results in planning. Exercises help participants ask "How does this apply to me?" and develop concrete ideas for their own assessment processes.

Ephraim Schechter, HigherEdAssessment.com

Track: 01E (FD)

Time: 9:00 - 11:30 a.m.

Room: Council

Pre-Institute Workshop

Sunday, October 24, 2010

Writing Proposals for Course/Curriculum Funding

This session is designed to assist faculty who have little or no experience writing a grant proposal for external funding to support curriculum development. Topics to be discussed include aspects of the proposal development process including writing a problem statement,

describing an appropriate intervention, clearly identifying methods to assess student learning, and selection of an appropriate project evaluator.

Pratibha Varma-Nelson, IUPUI; and Nancy Pelaez, Purdue University

Track: 01F (SD)
Time: 1:00 - 3:30 p.m.
Room: Council

Pre-Institute Workshop
Sunday, October 24, 2010
Beginner and Advanced

Don't Fail to Plan: Developing and Assessing a Student Affairs Strategic Plan

This workshop will describe student affairs strategic planning processes and the approaches used to evaluate the plans. A specific example of a division that established, executed, and successfully completed the goals of a strategic plan will be discussed. One reason for the success of the process was the comprehensive evaluation and assessment component. The measures used in the evaluation included institutional data, departmental data, and qualitative assessments. Participants will have the opportunity to determine how such a process could be facilitated on their campus and identify appropriate measurement techniques. The links between strategic planning at the division level, institution level, and accreditation requirements also will be discussed.

Robert W. Aaron, IUPUI; and A. Katherine Busby, Tulane University

Track: 01G (EP)
Time: 1:00 - 3:30 p.m.
Room: Cabinet

Pre-Institute Workshop
Sunday, October 24, 2010

Institutional Portfolios and Online Self-Studies: The State of the Art in 2010

Online presentation of at least some self-study materials is commonplace today in the context of regional accreditation. Use of the Web to manage the self-study process may be even more widespread. Yet, to date, none of the regional associations and commissions has provided guidelines or recommendations for good practices in developing and exhibiting self-studies or related information online. In this workshop, presenters and participants will discuss these questions: How are colleges and universities using the Web today to support self-study development and to demonstrate effectiveness and accountability for regional accreditation purposes? What lessons from the experiences of the past decade remain relevant? What can we expect in the future? The presenters managed the creation of two early online institutional portfolios/accreditation self-studies and have continued to improve these media.

Susan Kahn, IUPUI; and Kathi A. Ketcheson, Portland State University

Track: 01H (CP)
Time: 1:00 - 3:30 p.m.
Room: Capitol 1

Pre-Institute Workshop
Sunday, October 24, 2010

Beginner and Advanced*

Assessment 101

Arizona State University has adopted a workbook that faculty use both independently and in our facilitated workshops. This workbook guides participants through a straightforward process of developing an assessment plan for any kind of academic program. The process includes self-checking along the way to ensure that the outcomes and measures identified are appropriate, useful, and likely to yield meaningful information about student learning. We have successfully used this workbook in the following ways:

- to guide large groups of faculty through the assessment planning process
- to coach individual faculty members struggling to create outcomes and measures for their programs
- as a self-guided tutorial available on our web site for faculty who prefer to work independently

Participants will engage in the same process that ASU faculty are led through, and leave with the foundation of an assessment plan for an individual program as well as the tools to complete the process or to guide others through the process.

In this hands-on workshop, participants will be encouraged (but not required) to bring mission documents from their institution. They will engage in the same process as our faculty to identify long-term goals for their program graduates and the knowledge and skills necessary for graduates to achieve those goals. They will use that information to work through the step-by-step process of drafting an outcome statement, using our easy checklist to determine whether the outcome meets the guidelines, then revising the draft into a final outcome statement. They will examine various kinds of measures and discuss the relative value of each, then identify specific measures for their outcomes. For each measure, they will develop performance criteria. Finally, they will consider how they might use the student data collected to answer questions about student learning in the program and consider whether and how to revise the curriculum to improve student learning.

At each step, participants' attention is focused on how each aspect of the assessment process supports the institutional mission, what evidence they have about student learning, and how they will use this evidence to drive their curricular decisions.

The process taught in this workshop is appropriate for undergraduate, graduate, and professional programs from all academic disciplines. It is also consistent with the assessment expectations of regional and specialized accreditation agencies.

Wanda K. Baker, Mary Ann Holtz, and Lietta Scott, Arizona State University

Monday, October 25, 2010

7:30 – 8:45 a.m. ~ Continental Breakfast ~ Continental breakfast is located in the first floor Capitol Ballroom Foyer and in rooms Grand 2 & 3 on the second floor.

Trudy W. Banta – Welcome and Introductions

Professor of Higher Education and
 Senior Advisor to the Chancellor for Academic Planning and Evaluation
 Indiana University-Purdue University Indianapolis

Why Are We Assessing? Rethinking Assessment's Purposes

Assessment has three common purposes: providing students the best possible education; making sure students not only learn what's important but that their learning is of appropriate scope, depth, and rigor; and ensuring that institutions are good stewards of resources. Now is the time to bring these three common purposes of assessment to the forefront and tackle them head-on, as a collective higher education community, with greater and broader dialogue and collaboration than we see now.

Linda A. Suskie

Vice President
 Middle States Commission on Higher Education

Using Assessment for Accountability, Accreditation, and Institutionalization of Civic Engagement

How is assessment being used as a key element in advancing accountability, accreditation and institutionalization of civic engagement? This session presents a large-scale “stock-taking” about the nature and extent of assessment in the institutionalization of civic engagement in higher education. It recognizes the progress made by Carnegie community-engaged classified institutions of higher education and acknowledges practices of these exemplary institutions. It will feature principles for both theory and application as a pathway forward.

What Culture Do We Want? An Argument for Deliberative Assessment with ePortfolios

This keynote address will examine the role of ePortfolios in program and institution-level assessment. It will argue that assessment ought to: support the development of authenticity and integrity at the heart of meaningful adult life; engage in the integration of social and individual goods at the heart of all successful institutions; embrace the multiple disciplinary epistemologies that are at the heart of the modern university; and be governed by the principles of deliberation at the heart of the American democracy.

ePortfolios can play a powerful role if institutions embrace their use as a disruptive innovation and take advantage of the affordances, constraints, and conventions of the ePortfolio genre and the multiple technologies through which it is actualized. The presentation will offer research results and examples of ePortfolios from seven years of the Inter/National Coalition for Electronic Portfolio Research’s work and from the speaker’s recently published book, *E-Portfolios for Lifelong Learning and Assessment*. The session will conclude with recommendations for future inquiry into ePortfolio and assessment.

Decades of Instructor-Built National Assessment. The Case of Chemistry and the ACS Examinations Institute

The Examinations Institute of the American Chemical Society has been producing nationally normed chemistry exams for 77 years. These exams cover chemistry instruction from high school to graduate school placement exams. This talk will provide an historical analysis of factors that allowed for this longevity of national testing, when other disciplines did not sustain similar efforts from the mid-20th century. Beyond the history, the presentation will also outline how the Exams Institute has responded to new assessment demands of the 21st century, and how it works to both maintain its longstanding base of users while providing assessment tools that attract new users. The role of national needs assessment work with chemistry instructors will be emphasized in identifying how future assessment development is planned.

Non-Cognitive Abilities and the First-Year Student: The Role of Assessment and Intervention

Considerable effort has been focused on identifying factors that contribute to learning, academic success, and persistence for college students. Research has clearly established the fact that academic outcomes are a function of both cognitive (academic) and non-cognitive (attitudinal/motivational) abilities. This presentation will provide an overview of recent advances in the measurement of non-cognitive abilities and the use of data from these measures to develop and implement more efficient and effective student support services.

Student Development and Diversity in Assessment

"In God we Trust, All Others Bring Data" are the words of former U.S. Secretary Margaret Spellings in remarks she made over eight years ago, as she challenged American higher education to show relevance to the learning process that is currently in place and to demonstrate how we are assessing student learning outcomes. As higher education continues to define our place in the global marketplace, it is evident that student affairs scholars, educators and practitioners must be able not only to identify assessment methods but to articulate the results of assessment that are either contributing to or interfering with student learning and success.

ACPA and NASPA entered into a Memorandum of Understanding to review, revise, and distribute a set of professional competences that should be the foundation for all aspects of

Primary Tracks: (AC) – Accreditation; (AM) – Assessment Methods; (CP) – Capstone Experiences; (CC) – Community College; (CE) – Civic Engagement; (EP) – ePortfolios; (FD) – Faculty Development; (FY) – First-Year Experiences; (GE) – General Education; (MJ) – Majors; and (SD) – Student Development

the profession. We will review and discuss the implications of these competences, particularly the assessment thereof.

In using assessment, evaluation, and research, we must recognize that there exist multiple levels in our agreed competences and various levels of understanding. We will explore several levels as identified in an earlier document, the ASK Standards (Assessment Skills and Knowledge content standards for student affairs practitioners and scholars) published by ACPA.

Assessment is the essential ingredient for a successful and sustainable program in today's higher education arena.

Gregory Roberts, ACPA - College Student Educators International at the National Center for Higher Education, Washington, DC

In Conclusion - What Was the Point Again?

Capstones take many forms; yet in some manner, they are supposed to provide both the student and the faculty some indication of achievement and learning. Two- and four-year institutions are moving toward requiring capstone experiences, and capstones are seen as High Impact Practices, but what does this mean for student learning and assessment?

Terrel L. Rhodes, Association of American Colleges and Universities

Defining and Assessing Faculty Competence for Community Engaged Scholarship

As community engagement becomes increasingly central in higher education, questions of what is involved in this dimension of faculty work, how to build faculty capacity for undertaking it in a scholarly way, and how to assess faculty mastery of the required competence become more and more salient. Several efforts are underway (e.g., the Faculty for the Engaged Campus [FEC] initiative sponsored by Community-Campus Partnerships for Health) to define the core competences of community engaged scholarship and to develop corollary assessment instruments. Facilitators in this session will share a multi-pronged assessment strategy developed in the context of the FEC initiative; the assessment strategy includes a competence-based self-assessment instrument developed at NC State, and a series of written reflection activities. Having critiqued the design and implementation of the assessment strategy and having reviewed some of the corollary data, participants will leave the session with sample competence statements for community engaged scholarship and sample assessment instruments.

Benchmarking in Higher Education

For approximately twenty-five years, higher education has been under increasing pressure to demonstrate accountability to its various constituents. Inherent in these mandates has been the assumption that, at some point, colleges and universities will be able to compare indices of their performance with that of peer institutions. Thus, recent years have seen the design and implementation of initiatives to allow just this type of benchmarking in higher education. This presentation will define and outline the characteristics of benchmarking in general and higher education in particular. In addition, examples of available higher education benchmarking initiatives will be provided.

Evidence-Based Curriculum Reform: Using Student Performance Data for Continuous Improvement

The University of Cincinnati has developed a novel approach to student development through a grant from the U.S. Department of Education's Fund for the Improvement of Postsecondary Education. By focusing upon the authentic skill development of a cohort of students, faculties can monitor their evolution throughout the curriculum. This allows for the introduction of a continuous improvement process to curricular reform efforts that is unprecedented and precedent-setting. While the methodology is currently in use with experiential learning student performance data, the theory behind it could be applied to any situation in which regular measures of student skill development are present.

Can an ePortfolio Catch on Fire: Campus-Wide Implementation of Mahara

Plymouth State University rolled out Mahara in January 2010. Within two months there were almost 300 active users and not just for program assessment purposes. Buy-in for the program was almost universal: from instructors, to leaders of co-curricular activities, to career advisors and even students, who found the system easy to use, and liked the social networking components. Educational institutions are looking to adopt ePortfolios for a number of uses, including institutional assessment, program assessment, and authentic student assessment. While one product may be superb at collecting artifacts for institutional/program assessment, the same product may be difficult to use and not student-centered. It can be costly if students do not always buy in to the system. When a campus decides to promote a culture that supports ePortfolios across the curriculum, and in all aspects of its activities, the system chosen must be rich with options, and yet easy to use. That's what Plymouth found in Mahara.

In this session, we will discuss how Mahara is being used at Plymouth State to meet the needs of institutional/program assessment, in addition to providing students with a tool for meeting their own personal and professional goals. We will discuss how the system is being

used at Plymouth State for everything from program assessment to social networking to online career fairs. And while most ePortfolio systems end and begin with student use, Mahara is also being used at PSU by faculty to build their own portfolios for the purposes of promotion and tenure. We will also discuss how the system was rolled out campus-wide and provide real-life examples of its use at PSU, as well as anecdotal information on the response of students and faculty.

Ellen Marie Murphy, Plymouth State University

Positioning Wikifolios for Participation, Understanding, and Achievement

Data and examples about “wikifolios” are presented from two graduate education courses. Wikifolios use the shared public writing space and associated threaded discussions to support diverse learning outcomes. Students first draft a core wikifolio that defines a personally relevant educational goal. For each weekly unit, students draft an additional wikifolio that applies the “relevant big ideas” of the unit to their educational goal. In lieu of typical discussion forums, students ask other students with similar interests and the instructor to comment on their wikifolios directly; extended threaded discussions are encouraged. Reflecting a broader “participatory” approach to assessment, much of the discussion and all of the wikifolio grading take place around student “reflections,” in which students reflect thoughtfully on their wikifolio entries and the discussion. To support demands for more objective accountability, the wikifolios are aligned to a conventional short-answer examination. By aligning the design of the units, the wikifolio activity, and the exam, very high standards for student learning can be met.

Cornerstones and Capstones: Professionalism, Partnerships, and Perspectives in Engineering Technology

This session identifies how cornerstone learning can provide the foundation for intermediate- and advanced-level outcomes, and provides examples from a variety of applied engineering technology disciplines. Capstone experiences assess how well students demonstrate the integration and application of technical knowledge and workplace readiness. Industry leaders can partner with faculty to evaluate capstone-level learning. In addition, the evaluation of senior projects can stimulate discussion regarding industry-specific common themes, linking both technical content and skills for workplace success. Techniques to introduce students to key professionalism concepts and develop and reinforce those skills at intervals throughout the curriculum leading up to the capstone will be discussed.

Doing Assessment as if Learning Matters Most: Simple, Practical, Classroom- and Course-Level Approaches

Assessment's primary purpose should always be to improve student learning. But turning that "should be" into reality can be a daunting challenge, because it requires the willing engagement of faculty and students. This fast-paced, highly interactive, hands-on session provides research-based guidelines and practical strategies for learning-centered (and faculty-directed) assessment at classroom and course levels. Participants try out at least seven face-valid assessment strategies and can expect to take away at least two or three to adapt and apply back on campus. A handout with related examples, materials, and references for follow up is provided.

Using CIRP Surveys to Assess and Enhance the Student Experience

In this session we briefly review the conceptual and empirical foundations of CIRP surveys and the ways institutions are using their CIRP results to guide improvement efforts. Examples from several four-year institutions will be offered to illustrate how colleges and universities have used CIRP results to assess undergraduate education, first-year experiences, general education outcomes, student persistence, and the interventions implemented to improve the student experience. Butler University has used its CIRP results in the development of its plan to assess the effectiveness of its new core curriculum requirements. The University of Michigan has used CIRP results to assess academic success and retention of first-year students in STEM majors.

Efficient Feedback for Effective Learning: How Less Can Be More

Assessment without feedback is just a compliance exercise. We all know that good feedback is critical to students' motivation, study strategies, and learning success. Yet students regularly complain about the quantity, timeliness, and usefulness of feedback they receive. Faculty argue that giving good feedback is time-consuming, difficult, and frustrating, particularly when students fail to use (or even read) our comments. This interactive session offers research-based guidelines for more efficient and more effective feedback. It also demonstrates several simple, practical, time-saving strategies for improving the odds that students (and faculty) value, read/hear, understand, and use feedback to improve learning (and teaching).

Building on a Rock: A University’s Collaborative Journey to Build a Sustainable Foundation in Outcomes Assessment and Strategic Planning

Institutions often manage strategic planning and outcomes assessment manually or with non-integrated technology and processes. Overcoming sustainability and shareability issues requires integration of people, process and technology. Included: sustainability in quality and availability of strategic and assessment information; improved timeliness, relevance, and shareability of information; bridges to improve retention .

Mapping: A Powerful Collaboration Tool

How can mapping facilitate collaboration? The tool can be used to develop new curricula, programs, and services; to see how core general education outcomes/objectives are addressed in the major; to determine where there are gaps in learning opportunities; and to track the types and suitability of assessments used across the curriculum. Discover how

Primary Tracks: (AC) – Accreditation; (AM) – Assessment Methods; (CP) – Capstone Experiences; (CC) – Community College; (CE) – Civic Engagement; (EP) – ePortfolios; (FD) – Faculty Development; (FY) – First-Year Experiences; (GE) – General Education; (MJ) – Majors; and (SD) – Student Development

you can use mapping to take teaching, learning, and service discussions to a new level through mapping.
