Making Major Decisions: Handout

Prepared by:
Cassandra R. Kepple
Dawn Y. Matthews
Juanita C. Washington

Scenario

You are a part of a team designing a new department initiative to create a seminar course for exploratory students.

What are some characteristics of the course that you think would be effective for your institution (time length, frequency, etc.)?

What are some topics that you think would be beneficial to cover? How would you support students of differing demographics?

Reflection Questions

- 1. What are the “big” questions that my stakeholders are interested in, that I am interested in, that informs my practice?**
- 2. How have we used the data to inform our decisions?**
- 3. What inequities exist according to the data?**
- 4. Have we made any efforts to address equity in our programs?**
