# Impact on Challenges

## Sampling attrition

Across all Gen Ed Goals the % student sample attrition decreased (2021-2022)

# Impact on Challenges

## Faculty discontent

Assessment folks are very helpful when attempting to complete these activities.

I was able to find what I needed through provided links as well as through written instructions.

I always worry a bit that I'm being too critical, or sometimes not critical enough. The rubric doesn't give me a chance to be either way, which I appreciate!

I absolutely love using the rubric and uploading scores. Compared to copying student work and mailing, this system is wonderful. I genuinely appreciate the innovation happening to make assessment much easier to complete- thank you!

Providing the two examples was helpful to understand how to score the assignment for the rubric.

I appreciated the email reminder to flag/pin to the top for easy reference! Easy to complete and the step by step video guide was useful.

# Impact on Challenges

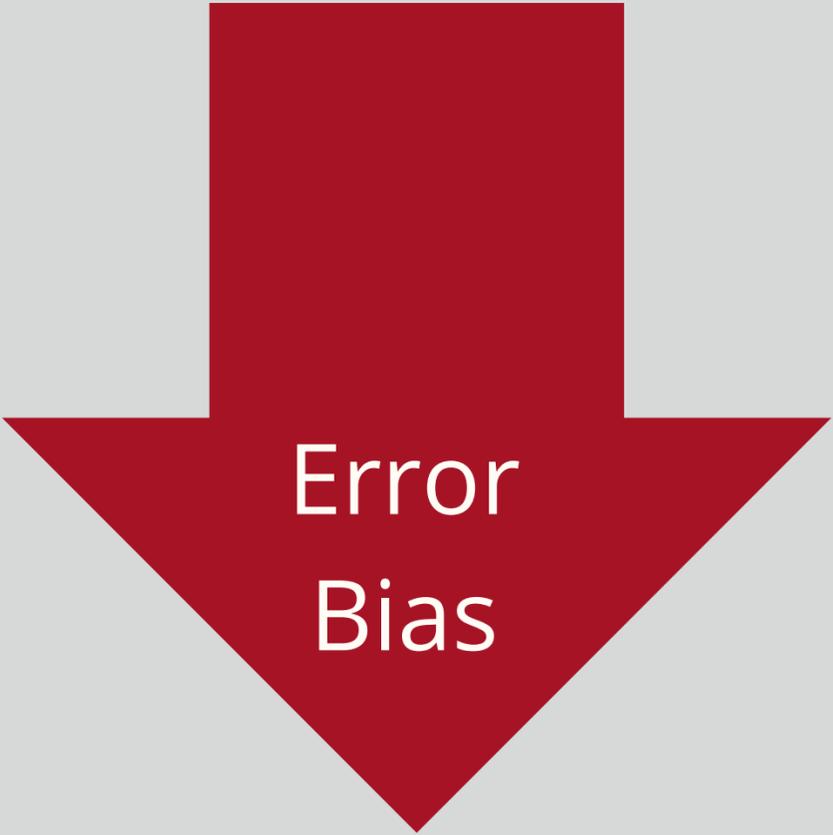

Curriculum mapping

"Blind scoring disengages rank-and-file faculty from the assessment process, leading them to view themselves as providers of evidence of student learning, not consumers of it."
