

# Remark® Test Grading

Educational  
Technology Perfect for  
Blended Learning

[RemarkSoftware.com](http://RemarkSoftware.com)

**Remark Test Grading** is a cloud-based test grading system that bridges the gap between in-class and virtual learning. This unique application allows teachers to create their own paper or online assessments and automatically grade them upon completion.

Make

Paper

Distribute

Online

Analyze

Create your own paper  
or online assessments.

Scan paper tests with any scanner,  
or students can take an online exam  
from any web browser.

Generate detailed  
reports instantly.

## Simple School Wide Test Grading Solution

Cloud based solution that provides easy deployment throughout your school. Leverage existing school devices for printing test forms, scanning completed tests, and printing a variety of analysis reports. Teachers can build custom answer sheets including question text, multiple-choice, true and false, open ended, and math grids. Distribute your tests to students on paper, online, or a mixture of both. Grading plain-paper or online tests has never been easier.

## Built-in Analysis and Reports

Remark Test Grading contains powerful analysis reports for viewing student, class, item, and test performance. Teachers can include learning objectives to see how students perform on specific standards or learning outcomes. In addition to the built-in test grading reports, grade information can be integrated with learning management systems like D2L, Canvas, and Blackboard. Grades can also be exported manually to formats such as Moodle, Excel or CSV for import into most other systems

## • Main Features

- Flexible form designer for the creation of paper and online tests.
- Create custom test forms or use generic forms. Student names can be pre-printed on forms if desired.
- Automatically grades multiple-choice and math questions. Provides on-screen grading for open-response items (short answers, graphs, etc.).
- Use multiple versions of assessments to prevent cheating on paper tests.
- Online tests can be displayed as one continuous page, or questions can be displayed one at a time in random order to minimize the potential of cheating.
- Provides detailed reports on student, class, item, and test performance. Teacher feedback can be incorporated into student reports.
- Change your answer key and regrade the test at any time. Create and report on learning objectives within your test to hone in on areas that need improvement.

## • Key Benefits

- Access from any modern browser on a PC, Mac, tablet, or any other device with nothing to install.
- Hosted with industry-leading AWS Services for maximum availability and security.
- Supports paper, online, or mixed modes for delivering your tests to students, even in a blended learning environment.
- Print and scan plain-paper tests using existing copiers and scanners.
- Saves hours of grading time and provides a detailed analysis of how students are performing on the tested material.
- Easily exports grades to other school systems or use one of our connectors for seamless integration into popular Learning Management Systems.
- Highly lauded customer service team with decades of experience working with educators around the world.
