

Student Engagement Essentials

Shift your student engagement strategy into high gear and focus on what matters most with our next-generation student engagement solution. Seamlessly encourage, track, assess, and recognize student involvement with improved outcomes.

Student Organization Management

Ditch the clunky web app. Provide a native mobile experience for students that makes it easy for your admin staff to manage and improve student involvement.

for Students

Student Organization Management

Equip student leaders with tools to manage their organizations: recruitment & rostering, communication with members, budgeting/finance, and elections.

User-Friendly Interface

Students can check-in to events, receive push notifications, and connect to resources in just 1 tap with our mobile app.

Built-In Gamification

A system students will actually use. Motivate students with points, badges, and levels - watch your involvement rates rise.

Co-curricular Transcript / ePortfolios

Offer students access to a shareable record of their involvement that will help them articulate their employability skills and land that job or internship.

for Admins

Engagement Management

Consolidate your workstreams with our robust form features, approval workflows, communication suite, and event tracking tools.

Real-Time Reporting

Collect data through real time tracking and post-event surveys. Generate reports and simplify assessment.

Easy System Management

An intuitive interface that is a breeze to set up and manage. Integrate with your existing systems for automated data flow.

White Glove Service

Direct access to support with hands-on implementation services so you can focus on what's important.

Simplify Student Engagement

We make co-curricular engagement a simple, fun experience for everyone involved.

Managing student groups shouldn't be a struggle. Suitable creates a more straightforward experience for students and staff by forgoing the laundry list of unused features to offer easy ways to perform essential functions stress-free.

Organizations can manage rosters, events, and membership all in one place

Schools can monitor student organization activity and growth in real time

Students can search for organizations to join and plan around busy schedules

Admins can access unique data and insights on group-based engagement

Events & Calendaring

Equip officers and staff with event management tools while maintaining the ability to review and approve the details – while gathering insights along the way.

- Offer event creation requests for admin review and approval
- Add RSVP and seat count info to events with just one click
- Let students self check-in to events for easy data collection
- Integrate your school's existing room reservation services

TIP: Abandon outdated, inefficient check-in processes that require scanning or swiping students in one by one. This limits event coverage to the number of available scanners and creates a slow and painful wait for students at events.

Gamify Involvement

Inspire students and help them articulate their stories to employers with our Co-Curricular Transcripts. Aligned with workforce expectations, our records are competency-based and shareable anywhere on the web or downloaded and printed for personal use.

- A holistic and personalized Co-Curricular Transcript highlighting student involvement
- Competency-based so employers can easily understand
- Showcases experiences, achievements, service, and ePortfolio items
- Students can choose to integrate their LinkedIn profile to showcase accomplishments to their professional network.

Tip: For schools already tracking involvement data, we can pull existing participation info directly into the student's Co-Curricular Transcripts so they don't have to enter details twice.

Will Suitable Suit You? We Think So.
